Firmware Pack

The firmware pack is a ZIP file that contains the modules and the features to install on your Mediatrix unit when a new release is available.

When unzipping the firmware pack, the content is extracted according to a pre-defined tree architecture. This creates a directory that contains the files required for the Mediatrix unit to properly upgrade its firmware.

New Functionalities

Incident #	CR #	Synopsis	Applies To
Description			
---	DGW-6378	Introduction of the new Survivability Proxy (SipProxy) service.	SipProxy
<p>In case of Hosted SIP Services failure, the new Survivability Proxy service (SipProxy) ensures internal call control for registered IP phones and other connected equipments while redirecting external calls to the PSTN, if available.</p> <p>This service is available on the C7, G7, S7, Sentinel 100, and Sentinel 400 platforms. A field-installable licence is required to activate this service.</p>			
---	DGW-6356	Add the support of RFC4730 Event Package for Key Press Stimulus (KPML).	all
<p>The support of RFC4730 Event Package for Key Press Stimulus (KPML) when acting as a user agent server was added. The feature is disabled by default and can be activated via the SipEp.UasKpmlSupport parameter.</p>			
---	DGW-6175	Increase the jitter buffer from 135 ms to 900 ms.	Sentinel 400, Sentinel 100, C7, S7, and G7
<p>More space was reserved for the jitter buffer allowing the Sentinel 400, the Sentinel 100, the Mediatrix C7, the Mediatrix S7, and the Mediatrix G7 to support a jitter buffer value up to 900 ms. A new mode of packet processing optimised for large Jitter buffer sizes was also added.</p>			
---	DGW-5996	Add the Argentina country tones.	all
<p>Argentina country tones are now available.</p>
